The Clerk reported on the findings following research. Hugh Wright from Great Longstone had in the main taken on the project of looking into all the angles involved with the implementation of a defib machine. A report had been circulated to members prior to the meeting. Four companies had been approached, with three quotes for machines. The Clerk pointed out that there had been confusion on the adoption of the kiosk. This was confirmed to be adopted by The Community Heartbeat Trust. The members looked at who other villages had used for their machines. The code system was discussed and the need for a number of local businesses/ houses to know the code. On a busy night the ambulance service does not always go through to the local office, whom would have the code. Clerk was asked to look into the insurance; looking at both the adding of a defib machine and also maximum numbers that could have the code and be insured. The option of a phone in the kiosk; training sessions; electrics and post installation checks were also discussed.

It was proposed to purchase the Community Heartbeat Trust defib machine in line with Great Longstone @ £1750 plus vat, with CHT to install at approx. £200 and to take up the annual maintenance package @£126.00. Clerk to arrange installation and training sessions alongside Great Longstone Parish. Clerk also to gain 2 quotes to paint the kiosk (paint supplied by British Coatings Federation member).
